IN THE UNITED STATES DISTRICT COURT
FOR THE WESTERN DISTRICT OF WASHINGTON
AT SEATTLE

9 REC SOFTWARE USA, INC.,
10
11 Plaintiff,
12 v.
13 BAMBOO SOLUTIONS CORPORATION;
14 MICROSOFT CORPORATION; SAP
AMERICA, INC., and SAP AG,
15 Defendants.

Case No. 2:11-cv-0554-JLR

MICROSOFT CORPORATION'S
MOTION FOR PARTIAL SUMMARY
JUDGMENT OF READY FOR
PATENTING

NOTE ON MOTION CALENDAR:
Friday, August 23, 2013

16 **I. INTRODUCTION**

17 Microsoft Corporation ("Microsoft") respectfully moves for partial summary judgment
18 that REC Software USA, Inc.'s ("REC") U.S. Patent No. 5,854,936 ("the '936 patent"), claims
19 1 and 8, were ready for patenting before the patent's August 22, 1990 "critical date."
20 Microsoft's technical expert Dr. Michael Kogan detailed his opinions on this issue in a 100+
21 page expert report comparing REC's PBS system to the asserted claims of the '936 patent.
22 REC's technical expert Dr. John Levine failed to rebut a single substantive opinion made by
23 Dr. Kogan. Indeed, Dr. Levine did not even allege to have examined REC's PBS system in
24 forming his opinion. Instead, Dr. Levine merely relied on *a single statement from REC's*
25 *counsel* to form his rebuttal opinion. Specifically, Dr. Levine's report appears to take the

1 position that he does not need to rebut Dr. Kogan's opinions that the PBS system was "ready
 2 for patenting" simply because REC's counsel told him that the PBS system was not on sale or
 3 in public use. Dr. Levine's rebuttal thus merely concludes that REC's PBS system is not "prior
 4 art"—a different issue on which Dr. Kogan did not opine. In light of Microsoft's
 5 overwhelming and unrebutted evidence that the PBS system was ready for patenting, Microsoft
 6 is entitled to summary judgment that the subject matter in the '936 patent was reduced to
 7 practice no later than July 11, 1990, and otherwise ready for patenting no later than April 17,
 8 1990.

9 **II. STATEMENT OF ISSUE TO BE DECIDED**

10 The sole issue for the Court to decide is whether the asserted claims of the '936 patent
 11 were ready for patenting no later than August 22, 1990 based on the unrebutted opinion of Dr.
 12 Kogan.

13 **III. STATEMENT OF UNDISPUTED MATERIAL FACTS**

14 1. The '936 patent issued on December 29, 1998 and claims priority to U.S. Patent No.
 15 5,649,204, which has an effective filing date of August 22, 1991.

16 2. The '936 patent's critical date for purposes of the on-sale bar of 35 U.S.C. 102(b) is
 17 one year before the patent's priority date, or August 22, 1990.

18 3. The United States Patent and Trademark office did not consider REC's PBS system
 19 during prosecution of the '936 patent.

20 4. On July 3, 2013, Microsoft's technical expert, Dr. Michael Kogan, served REC an
 21 expert report spanning 116 pages regarding the invalidity of the '936 patent.¹

22 5. Dr. Kogan opined in his report that the asserted claims of the '936 patent were:

23

24

25 ¹ Ex. 1 (July 3, 2013 Third Supplemental Expert Report of Dr. Michael S. Kogan Regarding the Invalidity of
 United States Patent No. 5,854,936). All cited exhibits are to the concurrently-filed Declaration of Brian G.
 Strand.

- 1 a. reduced to practice under 35 U.S.C. § 102 (i.e., the elements of the asserted
2 claims were literally met by REC's PBS system) no later than August 12, 1990;
- 3 b. reduced to practice under 35 U.S.C. § 103 (i.e., any differences between the
4 elements of the asserted claims and REC's PBS system were obvious in light of
5 the prior art and the knowledge of a person skilled in the art) no later than July
6 11, 1990; and
- 7 c. otherwise ready for patenting (i.e., through REC's preparation of drawings
8 and/or other descriptions of its PBS system that were sufficiently specific to
9 enable a person skilled in the art to practice the asserted claims) no later than
10 April 17, 1990.²

11 6. On July 17, 2013, REC's expert, Dr. John Levine, offered the following five paragraph
12 report in response to Dr. Kogan's report:

13 I submit this Report in response to the Third Supplemental Report of Dr.
14 Michael S. Kogan wherein Dr. Kogan opines that "REC's prior art PBS System
15 anticipates or renders obvious the Asserted Claims of the '936 patent." Kogan
at 4.

16 It is my understanding that to be prior art to the Asserted Claims of the '936
17 patent, as Dr. Kogan contends, REC's PBS System must have been "in public
18 use or on sale in this country, more than one year prior to the date of application
for patent in the United States." 35 U.S.C. 102(b).

19 To support his opinion, Dr. Kogan has assumed (but provided no evidence) that
20 (1) "REC's PBS System was offered for sale in the United States at least one
21 year prior to the priority date of the '936 patent;" Kogan at 20, and (2) "REC's
PBS System was publicly used in the United States at least one year prior to the
priority date of the '936 patent." Kogan at 21.

22 **I have been informed by counsel that Dr. Kogan's assumptions (1) and (2)
23 are contrary to the evidence. Accordingly, REC's PBS System is not prior
art to the Asserted Claims of the '936 patent.**

25 ² See Ex. 1 at 83; see also concurrently-filed Declaration of Michael S. Kogan.

1 Because REC's PBS System is not prior art to the Asserted Claims of the '936
 2 patent, it is my opinion that REC's PBS System does not anticipate or render
 3 obvious the Asserted Claims of the '936 patent.³

4 7. Based on REC's discovery responses to date regarding any alleged differences between
 5 REC's PBS system and the asserted claims, Microsoft is unaware of any material facts REC
 6 could raise in rebuttal.

7 8. On July 18, 2013, based on Dr. Levine's report, Microsoft's counsel asked REC's
 8 counsel to confirm that REC was not going to specifically contest Dr. Kogan's opinions, and
 9 was not going to otherwise contest the ready for patenting prong of Microsoft's on-sale/public
 10 use defense.⁴

11 9. On July 19, 2013, REC's counsel responded that REC continues to contest both Dr.
 12 Kogan's opinions and the ready for patenting prong.⁵

13 IV. **LEGAL STANDARDS**

14 Summary judgment is proper when "the movant shows that there is no genuine dispute
 15 as to any material fact and the movant is entitled to judgment as a matter of law." Fed. R. Civ.
 16 P. 56(a). The initial burden of establishing the absence of a genuine issue of material fact is on
 17 the moving party. *Celotex Corp. v. Catrett*, 477 U.S. 317, 330 (1986) (Brennan, J., dissenting
 18 on other grounds). When, as here, the movant bears the burden of persuasion at trial, it must
 19 present "credible evidence . . . that would entitle it to a directed verdict if not controverted at
 20 trial." *Id.* at 331. The burden of production then shifts to the non-movant, "either to produce
 21 evidentiary materials that demonstrate the existence of a 'genuine issue' for trial or to submit
 22 an affidavit requesting additional time for discovery." *Id.*

23 While the challenger must overcome a clear and convincing standard when invalidating
 24 a patent, the fact finder may give additional weight to references not considered by the PTO

25 ³ Ex. 2 (July 17, 2013 Supplemental Expert Report of John Levine Re On Sale Bar and Public Use Defenses), at
 1 (emphasis added).

⁴ See Ex. 3 (July 18, 2013 Email from Elacqua to Lyon), at 1.

⁵ See Ex. 4 (July 19, 2013 Email from Lyon to Elacqua), at 1.

1 during prosecution of the patent. *See Microsoft Corp. v. i4i Ltd. P'Ship.*, 131 S.Ct. 2238, 2251
 2 (“Simply put, if the PTO did not have all the material facts before it, its considered judgment
 3 may lose significant force. And, concomitantly, the challenger’s burden to persuade the jury of
 4 its invalidity defense by clear and convincing evidence may be easier to sustain.”) (internal
 5 citation omitted).

6 A patent is invalid if “the invention was ... in public use or on sale in this country,
 7 more than one year prior to the date of the application for patent in the United States.” 35
 8 U.S.C. § 102(b). Under the Supreme Court’s holding in *Pfaff*,

9 [T]he on-sale bar applies when two conditions are satisfied before the critical
 10 date. First, the product must be the subject of a commercial offer for sale. ...
 11 Second, the invention must be ready for patenting. That condition may be
 12 satisfied in at least two ways: by proof of reduction to practice before the
 13 critical date; or by proof that prior to the critical date the inventor had prepared
 14 drawings or other descriptions of the invention that were sufficiently specific to
 15 enable a person skilled in the art to practice the invention.

16 *Pfaff v. Wells Electronics, Inc.*, 525 U.S. 55, 67-68 (1998).

17 V. ARGUMENT

18 In his expert report, Dr. Kogan analyzed PBS System documentation and source code
 19 located on recently produced backup tapes to determine (1) that all of the elements in the ’936
 20 patent’s asserted claims were present in the PBS System prototype (i.e., that the asserted
 21 claims were reduced to practice), and (2) that REC had prepared documentation sufficient to
 22 enable one of ordinary skill in the art to practice the asserted claims. For example, a file
 23 restored from one of REC’s backup tapes named “PROTOCOL.TEXT,” last modified on April
 24 6, 1990, contains the entire command protocol used by the PBS “client” and “server” to make
 25 the requests and provide the responses claimed by the ’936 patent. *See* Ex. 1, at 38-39. As an
 additional example, a file named “PROTOMN.TEXT,” last modified on April 5, 1990,
 contains a diagram of the exact type and sequence of client-server interactions claimed by the

1 '936 patent. *See id.* at 41. Dr. Kogan's report contains many pages of detailed analysis
 2 demonstrating that each element of the asserted claims existed and was ready for patenting by
 3 the '936 patent's critical date. *See, e.g., id.* at ¶¶ 188-289. Further, his analysis centers on
 4 REC's source code and documentation files, which REC did not submit to the PTO during
 5 prosecution of the '936 patent's application.

6 Dr. Levine's rebuttal report ignores the issue of whether the asserted claims were
 7 reduced to practice or otherwise ready for patenting. Instead, Dr. Levine focuses on whether
 8 REC's PBS system was offered for sale or publicly used in the United States before the critical
 9 date—a subject upon which Dr. Kogan did not opine. Toppling his own straw man, Dr. Levine
 10 concludes: "I have been informed by counsel that Dr. Kogan's assumptions (1) and (2) are
 11 contrary to the evidence. Accordingly, REC's PBS System is not prior art to the Asserted
 12 Claims of the '936 patent." Ex. 2, at 1. Again, Dr. Levine offers no opinion or analysis to
 13 rebut Dr. Kogan's substantive opinions that the asserted claims were reduced to practice or
 14 otherwise ready for patenting before the critical date. Yet REC remains adamant that it will
 15 contest these issues at trial.

16 Microsoft's expert has put forth credible evidence that the '936 patent was reduced to
 17 practice or otherwise ready for patenting on or before August 22, 1990. REC had an
 18 opportunity through its expert's rebuttal report to demonstrate that specific material facts exist
 19 which give rise to a genuine issue related to this second prong of the on-sale bar, but REC
 20 chose not to do so. REC therefore has no evidentiary basis to demonstrate the existence of a
 21 genuine issue for trial, as required by the Federal Rules and controlling case law. *Celotex*, 477
 22 U.S. at 331. Thus, Microsoft respectfully requests summary judgment that the '936 patent was
 23 reduced to practice no later than July 11, 1990, and otherwise ready for patenting no later than
 24 April 17, 1990.

25

1 **VI. CONCLUSION**

2 For the foregoing reasons, Microsoft respectfully requests that the Court grant
3 Microsoft's motion and grant summary judgment based on the unrebutted report of Dr. Kogan,
4 that the '936 patent was reduced to practice no later than July 11, 1990, and otherwise ready
5 for patenting no later than April 17, 1990.
